

OM PRAKASH YADAV

Full-Stack Software Engineer | Bangalore, India

+91 9064377742 | omprakashnitdgp@gmail.com | linkedin.com/in/omprakash-nitdgp | github.com/om-prakash-yadav

SUMMARY

Full-Stack Software Engineer with 2+ years of full-time experience and a one-year development internship, shipping production applications end to end with **Node.js**, **React.js**, **TypeScript**, **Java**, and **AWS**, and building **agentic AI** with LLMs, RAG, and MCP. Delivered 25% faster load times, 20% better Core Web Vitals, and a #1 hackathon ranking for shipping AI agents to production.

EDUCATION

National Institute of Technology, Durgapur

Bachelor of Technology (B.Tech.)

Jawahar Navodaya Vidyalaya, Purulia | Class XII (CBSE): 90.8% | Class X (CBSE): 9.8 CGPA

Sep 2020 – Apr 2024

Durgapur, India

Purulia, India

EXPERIENCE

Member of Technical Staff 2 (MTS-2)

Tessell India Pvt. Ltd.

Mar 2026 – Present

Bangalore, India

- Build full-stack features for a **Tauri** cloud-operations desktop app spanning **28 AWS services**, owning **React/TypeScript** UI and **Rust** services.
- Integrate **AWS** cloud APIs and cloud-profile authentication flows, fixing token and session-state defects.
- Designed **AI agents** for SRE and DBA workflows automating incident linkage, deployment tracking, and reliability reports.

Software Engineer

Deloitte USI

Jul 2024 – Feb 2026

Hyderabad, India

- Developed full-stack modules for Henry Schein's healthcare suite, serving **1M+ customers** across **300+ clinical solutions**.
- Built and optimized **Node.js/Express.js** REST APIs with JWT-secured, **HIPAA-ready** authentication for healthcare data.
- Translated UI/UX wireframes into reusable **React.js** components (Hooks, Redux, Context API), cutting load times by **25%**, development effort by **30%**, and new-developer onboarding time by **40%**.
- Improved Core Web Vitals (LCP, FID, CLS) by **20%** through performance monitoring, profiling, and debugging.
- Collaborated with design, product, and QA teams in Agile/Scrum sprints to deliver client releases on schedule.

Software Developer Intern

TetraTrion Technologies Pvt. Ltd.

Aug 2023 – Jul 2024

Bhubaneswar, India

- Developed client-facing dashboards for Digi Ubique's industrial clients, building **Node.js** REST APIs for **React/ECharts** UIs.
- Built reusable UI components and integrated RESTful APIs across multiple client projects.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, Rust, SQL, HTML5, CSS3

AI & LLMs: Agentic AI, AI Agents, LLM Integration (OpenAI, Claude APIs), RAG, LangChain, LangGraph, MCP, Prompt Engineering

Frontend: React.js, Next.js, Angular, React Native, Redux, Zustand, Tailwind CSS, Styled Components, Vite, Apache ECharts

Backend: Node.js, Express.js, Spring Boot, REST APIs, GraphQL, Microservices, WebSockets, JWT, OAuth 2.0

Databases: PostgreSQL, MongoDB, DynamoDB, Redis

Cloud & DevOps: AWS (Lambda, API Gateway, Cognito, CloudTrail, Config), Docker, Kubernetes, Terraform, Kafka, CI/CD, Git

Desktop: Tauri, Cross-Platform Desktop Apps (macOS, Windows)

Testing & Tools: Jest, Vitest, Cypress, Playwright, Claude Code, Agile/Scrum

Spoken Languages: English, Hindi, Bengali

PROJECTS

Cloud Estate Explorer | Tauri, Rust, React, TypeScript, Force-Graph, AWS

Tessell

- Built List and Network views over scanned AWS estates, with an Account → Service → Resource tree matching the AWS console.
- Developed an interactive **force-directed topology graph** with service glyphs, relationship labels, hover highlighting, and filter chips.
- Integrated estate scanning with live scan progress, per-profile refresh, and automatic full rescans after app updates.

Knowledge Base with RAG Chat | React, TypeScript, SSE Streaming, LLMs, RAG

Tessell

- Built a document knowledge base with category cards, nested folders in a VS Code-style tree, resizable panels, and document upload.
- Implemented a real-time **streaming chat** (Server-Sent Events) that answers questions grounded in each category's documents.

Secure Integrations and Runbook Automation | Rust, OAuth 2.0, OS Keychain, AWS SSO

Tessell

- Moved OAuth tokens (Slack, Jira, Linear, GitHub, Google) from plaintext files into the **OS keychain**; built Google Drive integration.
- Added AWS SSO session recovery that auto-resumes interrupted runbooks, plus step-by-step execution and retries with editable parameters.

AI Agents for Reliability and Operations | Agentic AI, LLMs, Claude Code, Node.js

Tessell Hackathon

- Built AI agents on issue-tracking and deployment data that link incidents to fixes and automate SRE/DBA reliability reports.

ACHIEVEMENTS

- Ranked **#1 for Most Ships to Production** and **3rd overall** in a company-wide hackathon at Tessell.
- Received **Applause** and **Spot Awards** at Deloitte USI for innovation and client delivery.
